

Everything About Sandblasting

SK 1000F

Saykar has been manufacturing surface treatment machines working with pressurised air since 2003. The design and principles of operation of these machines are entirely owned by Saykar. SK 1000F Injection Sandblasting Machine with Front Cover was compact designed for sandblasting of parts upto 90cm. It is convenient for general sandblasting processes with injection system. Sandblasting pressure and abrasive quantity can be adjusted. It could be used for Sandblasting advantageously for the applications of material surface cleaning, roughening and polishing. Since the front door does not have opening distance, it does not occupy extra space during loading and unloading. SK 1000F with front-loading capability can be folded upwards and It has a front cover supported by shock absorbers.
